

Office of Sevier River Commissioner

DELTA, UTAH R.F.D. 84624

November 10, 1970

W. ROGER WALKER

DIVISION OF WATER RIGHTS,
Mr. Donald C. Norseth,
Directing Hydrologic Engineer,
442 State Capitol,
Salt Lake City, Utah 84114

Dear Sir,

Enclosed is a hydrograph and basic data of the Central Utah Canal Loss Study requested by you.

I reviewed and changed a little of the information furnished the Division of Water Resources. Specifically I included the April record of diversions passing Landis Check and some gage readings taken on the lower end of the Canal. Also, I included the days of partial flow which was left out of the recent report.

If any lining projects are undertaken, the water savings would be on a total year basis; also, the losses incurred by filling and emptying of these large earthen canals would be an important factor in determining the economical feasibility of any lining project.

I am also including a review of the Early Action Program of the Sevier River Basin Study as it pertains to the Central Utah Water Company.

I think these people, somehow, need to get the facts on the record.

Sincerely,

ROGER WALKER
Sevier River Commissioner
Delta, RFD, Utah 84624

RW/ew
